MigrateExpress™

A Rapid Migration Solution For Qlik®Customers Moving From QlikView® To Qlik Sense®

MigrateExpress™ is a complete service offering developed exclusively by BlueOrbit Solutions for existing QlikView customers who are planning an upgrade to Qlik Sense. The program leverages the expertise of a Qlik Solution Provider to conduct a complete assessment of a customer's existing QlikView environment, development of a comprehensive migration plan, and deployment of an optimized Qlik Sense application.

Minimize Migration Cost & Maximize Qlik Sense User Adoption

MigrateExpress™ comes with a proven methodology, acceleration processes, optimization templates, and proprietary tools that help organizations simplify the process of migration from QlikView to Qlik Sense. In 2 manageable steps, an organization can begin to use the most powerful and complete solution to migrate from QlikView to Qlik Sense in a fast, efficient, and cost-effective manner.

The MigrateExpress™ 2-Step Process

In just two simple steps, BlueOrbit can help an organization rapidly migrate from QlikView to Qlik Sense.

STEP 1 — Assessment
Gain A Clear Understanding Of QlikView & Develop A Plan For Migration

Discover › Gap Analysis › Migration Approach

» The Assessment step of the MigrateExpress™ process begins with a **DISCOVERY** of the QlikView applications to be migrated using BlueOrbit's **MigrateExpress™ Analyzer** tool.

» A subsequent **GAP ANALYSIS** process delivers complexity, usage and compatibility scorecard based on the application metadata.

» The result is a **MIGRATION APPROACH** that outlines the scope and migration roadmap.
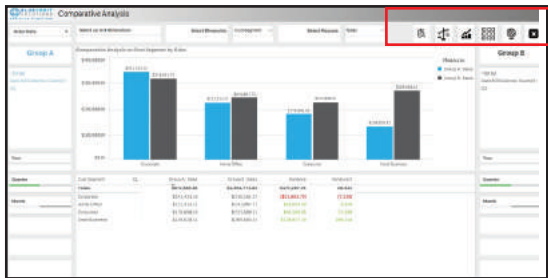

STEP 2 — Migration
Fast & Cost-Effective Deployment Of Qlik Sense

Plan › Migrate › Validate › Deploy

» The Migration step of the MigrateExpress™ process begins with developing a detailed project **PLAN**.

» Within the **MIGRATE** process, QlikView applications are prepared, converted to Qlik Sense, and a modern UI is designed.

» To bridge the feature gaps, third party extensions are utilized.

» The applications are enhanced for simplified self-service by integrating BlueOrbit's **BOS Explorer™** analysis tools.

» The **VALIDATE** process involves user acceptance testing (UAT) and performance testing.

» The final activity is to **DEPLOY** the application for end-user access.

QlikView Applications Discovery

Enhance your user experience of migrated applications with
BOS Explorer™ - Simplified self-service analysis tools

BOS Explorer™ is a proprietary suite of self-service analysis tools developed exclusively for Qlik Sense® by BlueOrbit Solutions. The dynamic, flexible, and customizable nature of BOS Explorer™ provides a powerful and easy-to-use interface to conduct instant data discovery which maximizes user adoption.

Qlik Sense Application with Integrated Analysis Tools

| Ad-hoc Analysis | Comparative Analysis | Trend Analysis | Grid Analysis | Geo Analysis |

Case Study – Manufacturing

QlikView Applications: 369
Users: 507

Business Requirements: Migrate current QlikView applications to Qlik Sense and leverage modern analytics platform for self-service visualization.

Solution Approach: Perform migration readiness assessment of QlikView applications and estimate the work effort. Migrate selected Phase I applications to Qlik Sense.

Assessment:
  » Clear understanding of migration process, work effort, and applications to be migrated
  » Migration assessment report with effort estimate and roadmap

Migration:
  » Modern and consistent UI/UX
  » Application optimization and self-service enablement
  » Reduced development time resulting in cost savings

Why BlueOrbit?

  » Migration Specialist
  » Proven methodology and streamlined processes
  » Proprietary tools and extensions
  » Global delivery model
  » Time & Cost Savings of ~30%

Our Flagship Solutions for Qlik®

MigrateExpress™
Rapid migration solution from QlikView® to Qlik Sense®

BOS Explorer™
Simplified self-services analysis tools for Qlik Sense®

BOS Express™
Rapid process enablement solution for QlikView® and Qlik Sense®
